

White Tiger Announces 3D Modeling Completed for its Marshall Lake Property, Ontario

West Vancouver, British Columbia – March 4, 2013 –White Tiger Mining Corp. (the “Company” or “White Tiger”) is pleased to report that it has completed new survey control of cut grid lines within and adjacent to the RM Zone copper discovery on its Marshall Lake property. The new survey was conducted using a Trimble ProXRT2 with OmniStar XP real-time differential GPS to sub metre (nominally 30 cm) accuracy. The Company then commissioned Caracle Creek International of Toronto to reinterpret previously obtained surface IP (Induced Polarization) data read from the grid. The Company is now in receipt of an unconstrained 2D inversion of said data, interpolated and expressed as 3D chargeability and conductivity isosurfaces to an effective depth of investigation of 120 metres below surface. Four discrete chargeability anomalies are apparent, which when interpreted with the copper 3D grade shell model, appear to further define the RM copper zones, with the best geophysical responses yet to be tested.

The Marshall Lake property is an advanced exploration stage copper (Cu), silver (Ag) and gold (Au) project located 30 km west of Nakina, Ontario (access is via good all weather gravel road from Hwy 11 and 22 km north of the main CNR rail Line).

The Company is presently analyzing recently received assay results and is still awaiting additional assay results for the remainder of holes drilled in the Company’s recently completed drilling program. The Company will announce the remaining assay results when received and analyzed.

The Company is planning to recommence drilling on the Marshall Lake property later this month (March), however, should there be any startup delays, drilling will be postponed long enough to obtain an exploration permit under the new permitting requirements which come into effect on April 1, 2013.

White Tiger has the option to earn a 50% interest in the Marshall Lake property project from Rainy Mountain Royalty Corp. (“Rainy Mountain” – TSX-V:RMO) and Marshall Lake Mining PLC (“MLM”) by spending \$4 million in exploration expenditures over 5 years and issuing 2 million shares over 4 years to Rainy Mountain. As well, White Tiger has the additional option to increase its interest to 75% by incurring such additional expenditures as are necessary to take the project to bankable feasibility stage. As at October 31, 2012 (the Company’s most recent fiscal year end), White Tiger has earned a 25% joint venture interest in the Marshall Lake property project.

This news release has been reviewed and approved by Gordon Gibson, P.Geo., who is acting as the Company’s Qualified Person for the Marshall Lake property project, in accordance with regulations under NI 43-101.
