

ASX Announcement: 14 July 2025

HIGH PRIORITY GOLD TARGETS TO BE DRILLED AT LEONORA SOUTH

Highlights

- 3,000m of reverse-circulation (RC) drilling planned at Leonora South
- Highly prospective targets; Challenge and Eclipse to be drilled
- Both prospects as close as 500m along strike from Asra's JORC 2012 Mineral Resource Estimate of 21,600oz at 2.1g/t Au at Sapphire
- Program follows up on significant shallow gold intersections from historic drilling
- Drilling commences mid-July with assays expected as early as September

Asra Minerals Limited (ASX: ASR; "Asra" or "the Company") provides an update on further exploration activities at the Leonora South Gold Project (**Leonora South** or the **Project**), located within the historic Kookynie mining centre approximately 180km north of Kalgoorlie, WA.

This next phase of exploration will consist of a 3,000m, closely spaced RC drilling program at the Challenge and Eclipse prospects, located within 500m of the existing JORC 2012 Mineral Resource at the adjacent Sapphire deposit (see Figure 1). Both targets have historic RC drilling with proven high grade gold intersections.

The aim of the present program is to confirm the grade and continuity of historic mineralisation and advance the geological understanding to assess the resource potential at these two highly prospective targets.

The Company expects the drilling to begin in the coming week, with the program completing in August.

This present program follows the completion of drilling at the Orion, Sapphire and Gladstone prospects. All samples from this initial program have been dispatched for analysis, and the Company is awaiting results.

Asra Minerals Managing Director, Paul Stephen:

"The upcoming drill program marks an exciting new phase of exploration at Leonora South, targeting two highly prospective gold prospects right on the doorstep of our existing Orion-Sapphire resource. Given that historical drilling has already confirmed near-surface mineralisation, we're confident this campaign will significantly advance our understanding of the broader system and unlock further value across the Leonora Gold Project."

Forward looking statements disclaimer

This announcement contains certain “forward-looking statements” and comments about future matters. Forward-looking statements can generally be identified by the use of forward-looking words such as, “expect”, “anticipate”, “likely”, “intend”, “should”, “estimate”, “target”, “outlook”, and other similar expressions and include, but are not limited to, indications of, and guidance or outlook on, future events, growth opportunities, exploration activities or the financial position or performance of the Company. You are cautioned not to place undue reliance on forward-looking statements. Any such statements, opinions and estimates in this release speak only as of the date hereof, are preliminary views and are based on assumptions and contingencies subject to change without notice. Forward-looking statements are provided as a general guide only. There can be no assurance that actual outcomes will not differ materially from these forward-looking statements. Any such forward looking statement also inherently involves known and unknown risks, uncertainties and other factors and may involve significant elements of subjective judgement and assumptions that may cause actual results, performance and achievements to differ. Except as required by law the Company undertakes no obligation to finalise, check, supplement, revise or update forward-looking statements in the future, regardless of whether new information, future events or results or other factors affect the information contained in this announcement.

Competent Person Statement

The information in this announcement that relates to the Orion-Sapphire Mineral Resources is based on, and fairly represents, information and supporting documentation compiled by Mr Paul Payne, a Competent Person who is a Fellow of the Australasian Institute of Mining and Metallurgy and is an employee of Payne Geological Services. Mr. Payne has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr. Payne consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this announcement that relates to the gold Mineral Resources for the Mt Stirling Project is contained in the ASX announcements released on 25 February 2019, 29 January 2020 and 5 September 2022. The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant market announcements, and that all material assumptions and technical parameters underpinning the estimates in the relevant announcement continue to apply and have not materially changed. that the Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original announcements.

About Asra Minerals Leonora Gold Projects

Asra Minerals' Leonora Gold Project comprises key project areas to the North and South of Leonora in the prolific region of Western Australia's Eastern Goldfields. Asra Minerals' Leonora Gold Project comprises key project areas to the North and South of Leonora in the prolific region of Western Australia's Eastern Goldfields. The projects cover a large area of prospective greenstone belts, with geological similarities to nearby multi-million-ounce gold deposits and operating mines, Asra's substantial exploration position provides a strong foundation for growth and consolidation in this renowned gold region.

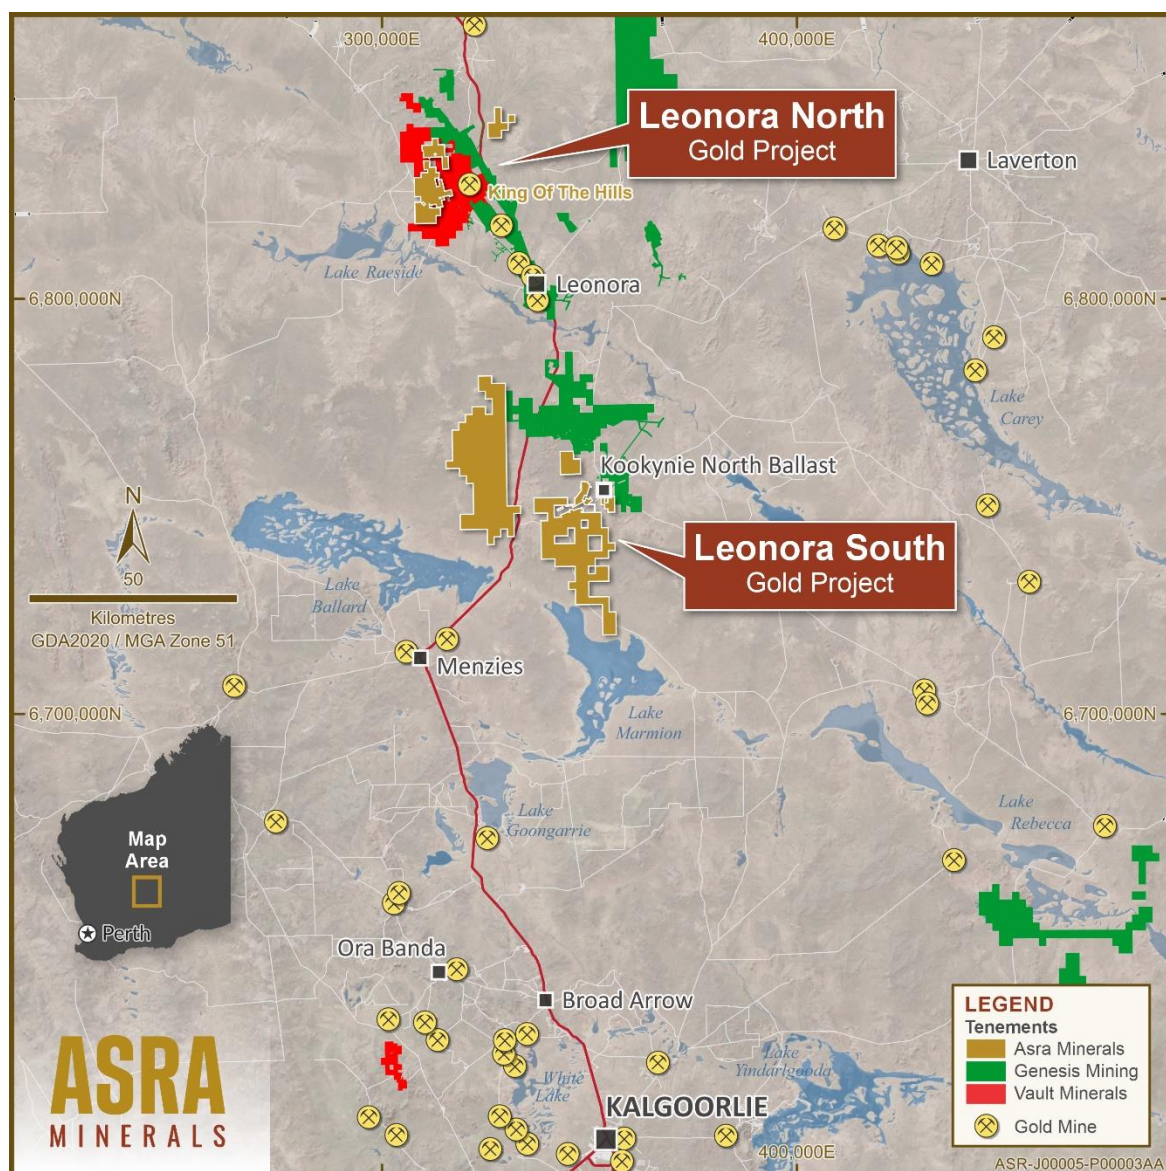

Figure 2: Asra's Leonora Landholdings

Leonora North – Mt Stirling

- Located 40km northeast of Leonora, Western Australia, within a prolific gold mining district.
- Situated in the Eastern Goldfields Super terrane of the Yilgarn Craton, the area is known for orogenic gold deposits.
- Close proximity to significant gold mines, including Vault Minerals' 6Moz King of the Hills mine and Genesis Minerals' 2Moz Leonora and Kookynie operations.
- Two JORC compliant gold resources:
 - Mt Stirling Viserion: 111koz at 1.6g/t Au (Inferred) and 26koz at 2.1g/t Au (Indicated)
 - Stirling Well: 15koz at 2.3g/t Au (Inferred)
- 12km of prospective ground along the Ursus Fault Line, with 9km yet to be explored.
- Identified targets east of the historic Diorite King Mine, which previously produced gold at high grades

Leonora South – Kookynie

- Leonora South consists of 8 semi-contiguous mining licences, covering 549 km².
- Located 60km south of Leonora in the Kookynie Goldfields, the area is known for high-grade gold discoveries, including the nearby Ulysses Operation with 850koz Au.
- JORC 2012 Mineral Resource Estimate of 48,000oz at 2.2g/t Au at the Orion-Sapphire Deposit.
- Recent drilling has shown mineralisation extends approximately 30m below previous intercepts, confirming gold grades at depth.
- Asra plans to expand resource estimates at Orion and Sapphire beyond the historical drilling limits of 100-150m below the surface.

Asra Global Gold Mineral Resources

Asra's Gold Projects	Category	Tonnes	Gold Grade g/t Au	Gold Ounces
Leonora North - Viserion	Indicated	391,000	2.1	26,000
	Inferred	2,158,000	1.6	111,000
Leonora North - Stirling Well	Inferred	198,000	2.3	15,000
Leonora South - Niagara - Orion	Inferred	370,000	2.2	26,409
Leonora South - Niagara - Sapphire	Inferred	320,000	2.1	21,605
TOTAL		3,437,000	1.82	200,064
