Expensed in personnel expenses	1,111,481	1,744,297
	1,987,030	2,697,321

Commentary on Results

RemSense delivered a year of significant operational progress, underpinned by strong project execution, expanding client adoption of virtualplant, and a return to positive cashflow across multiple quarters. The Company successfully achieved its first underlying cash EBITDA of \$574k in FY2025, reflecting disciplined execution, improved margins, and effective cost management.

Across 2025, customer receipts strengthened considerably. Q1 delivered \$1.13m in receipts with multiple global projects successfully completed. Q2 built on this with a 78% quarter-on-quarter increase to \$1.18m, alongside post-quarter receipts of \$1.08m. Q3 achieved another strong quarter with \$1.403m of customer receipts and positive cashflow from operating activities of \$420k. While Q4 receipts moderated to \$255k due to project timing, the Company closed the year with \$3,435,517 in revenue up 106.54% from \$1,663,375 in the prior year.

Further, the Group achieved a gross margin of 71.92%, an improvement from 63.96% in the prior year. This improvement in gross margin can be attributed to cost control measures and improved operational efficiencies. The Group's net loss of \$771,459, is a 66.55% reduction from the loss of \$2,306,165 in the prior year. This reduction is the result of improved gross margins and strategic reductions in operating expenses, including more efficient use of staff hours.

This momentum highlights both the scalability of RemSense's model and the increasing demand for virtualplant. Importantly, quarterly results demonstrated that disciplined cost control, improved project delivery efficiency, and enhanced gross margins were sustainable throughout FY2025.

RemSense executed a diverse portfolio of projects across Australia, Southeast Asia, and North America. Key deliveries included high-resolution scanning for Tier 1 LNG facilities in Australia, Newmont's Boddington Gold Mine, Chevron's deepwater Gulf of Mexico assets, and Woodside's operations. These projects emphasised RemSense's ability to provide both terrestrial and drone-enabled data capture for complex, large-scale facilities.

The Company also advanced virtualplant's capabilities significantly during the year. Enhancements included improved user interface design, AI-driven asset audit applications, and integrations with enterprise systems such as SAP and IBM Maximo. New innovations, such as deep-water drone-enabled water sampling and advanced LIDAR capture for immersive 3D training environments, positioned the platform as a market leader in digital asset management.

FY2025 was marked by deepening relationships with global Tier 1 operators. Renewals of virtualplant subscriptions by Newmont, Woodside, and Triangle Energy validated the platform's value proposition. Partnerships with Chevron continued to expand, with advanced discussions progressing on positioning virtualplant as a global inspection platform across its operations.

RemSense also broadened its reach into new markets. Engagements were secured with NEXTDC in the data centre sector and discussions commenced with another large Oil & Gas producer to mirror Chevron's digital twin initiatives. At the same time, the Company renewed focus on the Defence sector, re-engaging under the DISP program and securing BARS aviation safety certification, a prerequisite for working with major resources clients.

During FY2025, RemSense strengthened its leadership and governance to support growth. The appointment of a new Commercial Director brought additional sales execution capability, while the promotion of the Company's longest-serving technologist to Chief Technical Officer reinforced continuity and innovation in the product roadmap.

RemSense exits FY2025 with a strong pipeline of high-value opportunities, several in advanced negotiation stages. These include potential global adoption of virtualplant by Chevron, deployment proposals with Newmont's African operations, and expansion into defence and infrastructure sectors. With recurring revenues growing, improved financial discipline, and expanding global partnerships, the Company is positioned for accelerated growth and improved shareholder value in FY2026.

* As the Group is in a loss position diluted EPS is the same as basic EPS.

Operating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Maker ("CODM"). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors of RemSense Technologies Limited.

For management purposes, the Group is organised into one operating segment, collecting customer data, processing this information, and delivering outcome reports. This includes technology research and development, RPAS services and its virtualplant Visual Twin software products, and services to a range of markets and applications. All the Group's activities are interrelated, and discrete financial information is reported to the CODM as a single segment. Accordingly, all significant operating decisions are based upon analysis of the Group as one segment. The financial results from the segment are equivalent to the financial statements of the Group as a whole. The accounting policies used by the Group in reporting segments internally are the same as those adopted in the financial statements.

There have been no changes to the basis of segmentation or the measurement basis for segment profit or loss since 30 June 2024.

Loss of control over entities

N/A

Accounting standards

The financial report is prepared in accordance with Australian Accounting Standards (AASBs) and Interpretations adopted by the Australian Accounting Standards Board (AASB) and the Corporations Act 2001, as appropriate for, for-profit entities. This report also complies with International Financial Reporting Standards (IFRSs) adopted by the International Accounting Standards Board (IASB).

Other than the disclosures made within this report, there are no other factors which have affected the results in the year, or which are likely to affect the results in the future.

Audited Financial Report

The Preliminary Final Report has been prepared in accordance with ASX Listing Rule 4.3A and has been derived from the unaudited Annual Financial Report.

The Preliminary Final Report is unaudited and contains disclosures which are extracted and derived from the Annual Financial Report for the year ended 30 June 2025. The Annual Financial Report is in the process of being audited.

The Company anticipates the independent audit report may include a material uncertainty related to going concern, based upon the cash balance at year end and operational cash requirements.

The Directors believe there are reasonable grounds the Group will be able to continue as a going concern, after considering the following factors:

- Capital raising undertaken post year end of \$750,600;
- Access to capital markets to raise additional funds if needed; and
- Ability of the Directors and management to continue managing its cash flows and cash reserves to successfully execute contracted projects and win new work whilst operating within the Group's budget.

Should the Group be unsuccessful in achieving the matters set out above, a material uncertainty would exist that may cast significant doubt about the Group's ability to continue as a going concern, and therefore, whether it will realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the financial report.

Authorised on behalf of the RemSense Technologies Limited Board of Directors

Warren Cook
