ASX ANNOUNCEMENT

11 September 2025

SHELL CONTRACT CONSOLIDATES REMSENSE'S TOP TIER GLOBAL ENERGY POSITION

RemSense Technologies Limited (**ASX: REM**) (**RemSense** or **the Company**) is pleased to announce that it has been awarded its first contract by Shell Energy to deliver an advanced digital visualisation platform to support facility commissioning.

The project represents a major milestone in the Company's strategy to expand its global energy client base and demonstrate the scalability of virtualplant in complex offshore developments.

The project will leverage the combined innovation and expertise of RemSense's proprietary **virtualplant** platform and collaboration partner Sentient Computing's advanced 3D visualisation and animation technologies. Together, these capabilities will deliver a powerful solution designed to improve commissioning accuracy, operational efficiency, safety, and overall asset performance.

The project will be executed through staged milestones over a three-month program commencing September 2025, with RemSense's contract valued at A$267,520. Ongoing support for the solution will be provided by RemSense's dedicated Managed Services team, ensuring long-term reliability and client value.

There are no material terms or conditions precedent requiring satisfaction to enable the contract works to commence or be fulfilled, and there are no terms or conditions to the contract considered outside of normal commercial terms and conditions, including termination clauses considered.

Warren Cook, RemSense Managing Director, said:

"*The award of our maiden Shell contract represents a major step forward for RemSense in applying **virtualplant** to complex offshore developments. It demonstrates the confidence that major Tier 1 energy companies has in our technology to deliver tangible value from commissioning to operations through improved accuracy, safety, and efficiency.*"

This contract further validates RemSense's growth strategy by extending the adoption of **virtualplant** across major global energy clients and highlights the increasing application of asset visualisation technologies in large-scale resource projects.

-ENDS-

This announcement has been approved for release by the Board of RemSense Technologies Limited.

About RemSense

RemSense Technologies Limited (**ASX:REM**) is a pioneer in advanced digital asset visualisation, delivering proven solutions to global energy and resources clients. Its proprietary virtualplant platform transforms high-resolution 3D imagery into intelligent visual twins, providing an intuitive and immersive environment for asset management. By combining precision photogrammetry with powerful data integration, virtualplant enables clients to optimise productivity, enhance safety, and reduce operational costs, demonstrating RemSense's expertise in turning cutting-edge technology into tangible value.
